Professional Experience

FullStack Web Developer [Neuralearn](#) Yaounde

Since April 2025

- **FullStack:** Helped in building both backend and frontend for an online tutoring web app [cleeroute.com](#) with the use of Go fiber and Next.JS
- **Server Side:** Deployed and managed, production ready backend API on Azure Cloud

Salesforce Developer And Administrator [Clouds Architects](#) Yaoundé

From March 2021 to September 2023

- **Guest User Experience:** Created and configured guest user profiles and security settings. Developed a custom solution using Flows and Lightning Web Components to enable guest users to seamlessly create opportunities within the organization.
- **Order Management:** Optimized order processing with declarative Flows, reducing cycle time and increasing accuracy. Maintained and enhanced existing Salesforce functionality, including custom objects, Apex triggers, and Visualforce pages.
- **Personalized Lead Capture:** Designed and implemented a personalized web-to-lead integration solution to optimize lead capture and ensure data accuracy.

Personal Projects [Personal](#) Yaoundé

Since August 2019

- **Web Development:** Created several Web Apps, and cloned some known sites with HTML/CSS and Javascript, React, Next JS. My GitHub: <https://github.com/Buezeth>
- **Game Development:** Worked on several personal game projects using Unity Engine and C#
